

## REVIEWERS IN 2004

---

The review process is the critical activity which controls the quality and appropriateness of papers published in the *International Journal of Fluid Power*. To ensure that only work of highest quality is accepted, it is important that each manuscript be carefully reviewed by the most competent scientists in the appropriate area of specialty. The *International Journal of Fluid Power* would like to thank all reviewers listed below for their support in the year 2004.

---

**Dr. Peter Achten**

Innas B.V., Breda, NETHERLANDS

**Prof. Andrew Alleyne**

University of Illinois at Urbana-Champaign, Department of Mechanical Engineering, USA

**Prof. Torben O. Andersen**

Aalborg University, Institute of Energy Technology, DENMARK

**Prof. Peter Beater**

University of Applied Sciences Südwestfalen, Department of Mechanical Engineering - Automation, GERMANY

**Prof. Guido Belforte**

Technical University of Torino, Department of Mechanical Engineering, ITALY

**Dr. Lawrence Blackman**

Parker Aerospace, Abex Division, Kalamazoo MI, USA

**Prof. Massimo Borghi**

DIMEC-University of Modena and Reggio Emilia, ITALY

**Prof. Wayne John Book**

Georgia Institute of Technology, Chair in Fluid Power and Motion Control, USA

**Prof. Richard Burton**

University of Saskatchewan, Department of Mechanical Engineering, CANADA

**Prof. Peter John Chapple**

NTNU Norwegian University of Science and Technology, Institute of Thermal Energy and Hydropower, Trondheim, NORWAY

**Prof. Esteve Codina**

Technical University of Catalonia, Department of Fluid Mechanics, SPAIN

**Prof. Dean Kim**

Bradley University, Department of Mechanical Engineering, USA

**Prof. Saeid Habibi**

University of Saskatchewan, Department of Mechanical Engineering, CANADA

**Prof. Heikki Handroos**

Lappeenranta University of Technology, Department of Mechanical Engineering, FINLAND

**Prof. H.-H. Harms**

Technical University Carolo-Wilhelmina Brunschweig, Department of Mechanical Engineering, Institute of Agricultural Machinery Sciences and Fluid Power, GERMANY

**Prof. Yasuhiro Hayakawa**

Nara College of Technology, Department of Control Engineering, JAPAN

**Prof. Kalevi Huhtala**

Tampere University of Technology, IHA Institute of Mechanical Hydraulics and Automation, FINLAND

**Dr. Jaroslav Ivantysyn**

Sauer-Danfoss GmbH, Neumünster, GERMANY

**Dr. Mohieddine Jelali**

Betriebsforschungsinstitut (BFI), VDEh-Institut für angewandte Forschung GmbH, Department Plant and System Technology, Düsseldorf, GERMANY

**Dr. Nigel Johnston**

University of Bath, Department of Mechanical Engineering, Centre for Power Transmission and Motion Control, UK

**Prof. Toshiharu Kagawa**

Tokyo Institute of Technology, Precision and Intelligence Laboratory, JAPAN

**Prof. Kenji Kawashima**

Tokyo Institute of Technology, Precision and Intelligence Laboratory, JAPAN

**Prof. Kazuhisa Ito**

Sophia University, Department of Mechanical Engineering, JAPAN

**Dr. Markus Kliffken**

Bosch-Rexroth AG, Elchingen, GERMANY

**Prof. Eiichi Kojima**

Kanagawa University, Faculty of Engineering, Department of Mechanical Engineering, JAPAN

**Prof. Kari T. Koskinen**

Tampere University of Technology, Institute of Hydraulics and Automation, FINLAND

**Prof. Gary W. Krutz**

Purdue University, Department of Agricultural and Biological Engineering, USA

**Prof. Dirk Lefebvre**

Vrije Universiteit Brussel, Faculty of Applied Sciences, Department of Mechanical Engineering, Brussels, BELGIUM

**Prof. Antonio Donato Maria Lippolis**

Dipartimento di Ingegneria Meccanica e Gestionale, Politecnico di Bari, ITALY

**Dr. Bernhard Manhartgruber**

University of Linz, Institute of Machine Design and Hydraulic Drive Technology, AUSTRIA

**Prof. Noah Manring**

University of Missouri-Columbia, Mechanical and Aerospace Engineering, USA

**Prof. Jean-Charles Maré**

INSA National Institute of Applied Science, Department of Mechanical Engineering, Toulouse, FRANCE

**Dr. Stefano Mauro**

Technical University of Torino, Department of Mechanical Engineering, ITALY

**Dr. Massimo Milani**

DIMEC-University of Modena and Reggio Emilia, ITALY

**Prof. Hubertus Murrenhoff**

RWTH Aachen, Institute of Fluid Power Transmission and Control IFAS, GERMANY

**Prof. Nicola Nervegna**

Technical University of Torino, Department of Energetics, ITALY

**Prof. Takao Nishiumi**

National Defence Academy, Department of Mechanical Systems Engineering, Yokosuka, JAPAN

**Prof. Toshiro Noritsugu**

Okayama University, Faculty of Engineering, Department of Systems Engineering, JAPAN

**Prof. Petr Noskievic**

Technical University of Ostrava, Faculty of Mechanical Engineering, CZECH REPUBLIC

**Dr. Jean-Claude Ossyra**

MAHA Fluid Power Laboratory, Purdue University, West Lafayette, USA

**Dr. Roberto Paoluzzi**

IMAMOTER - C.N.R. Institute for Agricultural and Earthmoving Machinery of the Italian National Research Council, Cassana (Ferrara), ITALY

**Dr. Andrew R. Plummer**

Instron Ltd., UK

**Prof. Terenziano Raparelli**

Technical University of Torino, Department of Mechanics, ITALY

**Prof. Jari Rinkinen**

Tampere University of Technology, Institute of Hydraulics and Automation, FINLAND

**Prof. Karl-Erik Rydberg**

Linköping University, Department of Mechanical Engineering, Division of Fluid Power Technology, SWEDEN

**Prof. Kazushi Sanada**

Yokohama National University, School of Engineering, Department of Mechanical Engineering, JAPAN

**Prof. Yasuo Sakurai**

Ashikaga Institute of Technology, Department of Mechanical Engineering, JAPAN

**Prof. Rudolf Scheidl**

University of Linz, Institute of Machine Design and Hydraulic Drive Technology, AUSTRIA

**Dr. Andrzej Sobczyk**

Fluid Power Laboratory, Institute of Machine Design, Cracow University of Technology, POLAND

**Prof. Greg Schoenau**

University of Saskatchewan, Department of Mechanical Engineering, CANADA

**Dr. Günther Starke**

APS GmbH, European Centre for Mechatronics, GERMANY

**Prof. Jacek S. Stecki**

Monash University, Department of Mechanical Engineering, Subsea Engineering Research Group, AUSTRALIA

**Prof. Bernd Stoffel**

Technical University of Darmstadt, Department of Turbomachinery and Fluid Power, GERMANY

**Prof. Katsumasa Suzuki**

Masashi Institute of Technology, Department of Mechanical Systems Engineering, JAPAN

**Prof. Tetsuhiro Tsukiji**

Sophia University, Department of Mechanical Engineering, JAPAN

**Prof. Eizo Urata**

Kanagawa University, Faculty of Engineering, Department of Mechanical Engineering, JAPAN

**Sheila L. Vieira**

M.I.M.E Department, University of Toledo, USA

**Prof. Tapio Virvalo**

Tampere University of Technology, Institute of Hydraulics and Automation, FINLAND

**Prof. John Watton**

Cardiff University, Division of Mechanical Engineering, UK

**Prof. Hironao Yamada**

Gifu University, Department of Mechanical and Systems Engineering, JAPAN

**Dr. Luca G. Zarotti**

IMAMOTER - C.N.R. Institute for Agricultural and Earthmoving Machinery of the Italian National Research Council, Cassana (Ferrara), ITALY

**Prof. Shinichi Yokota**

Precision and Intelligence Laboratory, Tokyo Institute of Technology, JAPAN

**Prof. Hideki Yanada**

Toyohashi University of Technology, Department of Mechanical Engineering, JAPAN
